## Responsible farming practices...

At **Rialto** we acknowledge wine producers who follow ecologically conscious farming practices. This may include organically grown or sustainably farmed grapes as well as subscribing to the practice of biodynamics.

**Organic** or sustainably farmed grapes are grown without the use of pesticides or chemical fertilizers and organic wines have had no sulfites added during the wine making process.

**Biodynamic** farming follows the principles set down by Austrian philosopher Rudolf Steiner. In addition to following organic farming principles, biodynamic farming practices are based around the rhythmic influences of the sun, moon, stars, and planets in an attempt to create a thriving sustainable ecosystem.
